16 Aug 2011 – **Advanced SystemCare Free 4** wants to be it all when it comes to keeping your system clean.

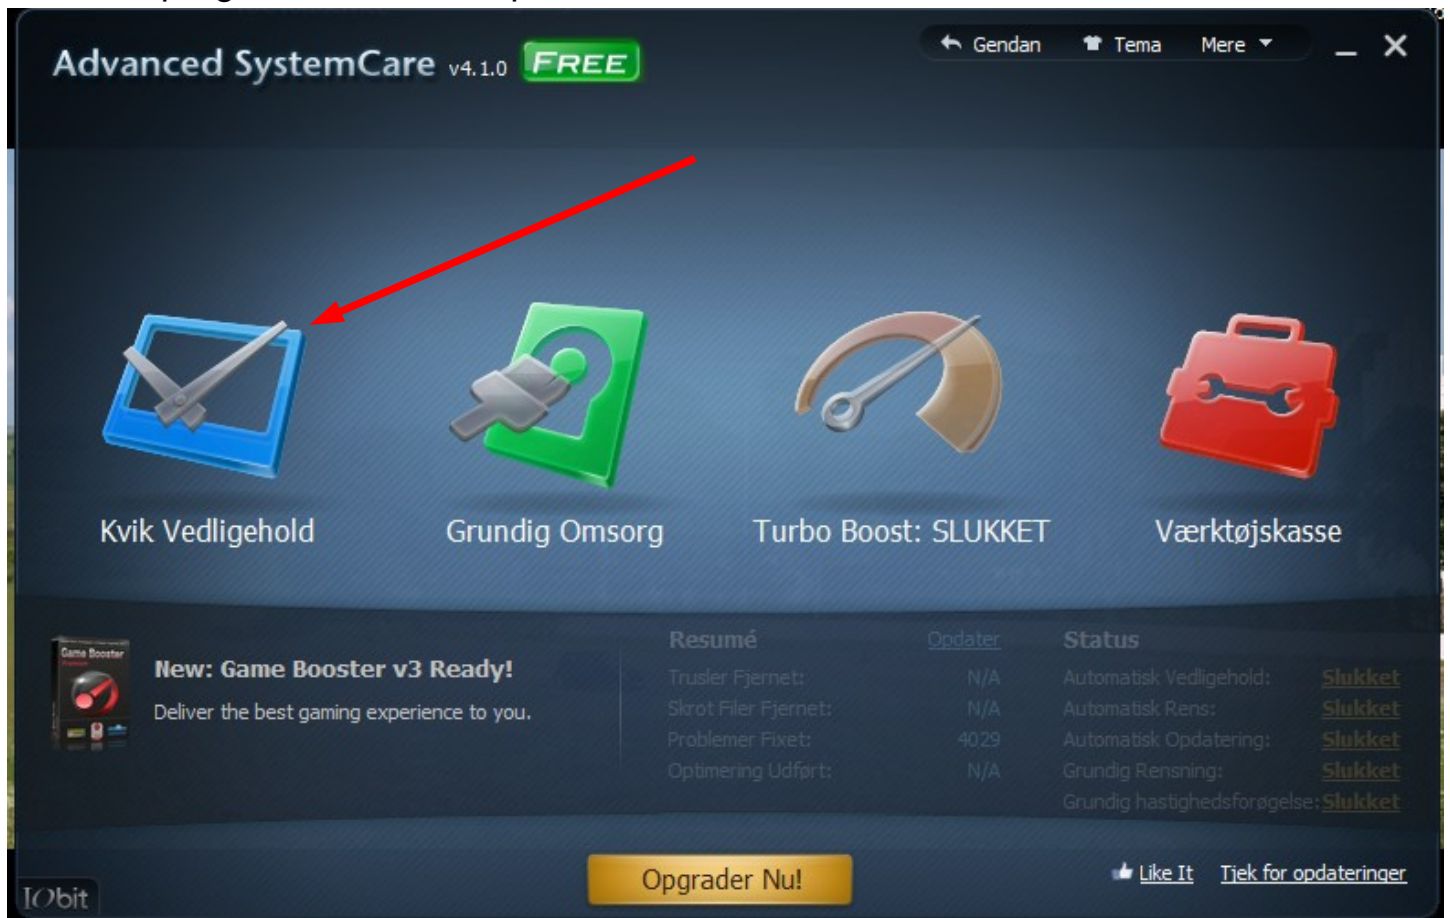

Her vælger du Download Now

The screenshot shows the CNET Download.com website for Advanced SystemCare Free. The page features a navigation bar with 'Downloads' selected. Below the navigation, there is a warning box: 'Inden du henter: Kør gratis scanning efter Windows-fejl'. The main content area has a large 'Download Now (28.68MB)' button with a green checkmark and 'CNET Secure Download' logo. Below this is a 'SPECIAL OFFER' section with a 'Buy it now' button. To the right, there is a preview image of the software interface and another warning box: 'Inden du henter: Kør gratis scanning efter Windows-fejl'. A red arrow points from the text above to the 'Download Now' button.

Hvis du har Windows 7 vælger du dette fornedet KØR

The screenshot shows a Windows 7 desktop. In the background, there is a Dell advertisement for 'Computers - DELL™' and a warning box: 'Kør gratis scanning efter Windows-fejl'. In the foreground, a yellow download dialog box is open, asking: 'Vil du køre eller gemme asc-setup.exe (28,6 MB) fra software-files-l.cnet.com?'. Below the question is a warning: 'Denne filtype kan beskadige computeren.' and three buttons: 'Kør', 'Gem', and 'Annuller'. A red arrow points from the text above to the 'Kør' button.

Til sidst under installationen kommer der "reklame" op om man vil installere toolbar m.m. Til dette vælger man UNDLAD.
Når programmet starter op er det Dansk.

Tryk blot på Scan Nu så finder programmet det der skal slettes
